

PEPT

Expert in insulation and scaffolding

Dear customers

Pept has been a family business for 30 years. We are one of the largest companies in the Nordic countries offering both insulation and scaffolding solutions.

Throughout our history, we have had the honour of long-term cooperation with numerous industries, mining companies and building services. We think of this long-term cooperation as a partnership, and we are in the business of partnerships.

Over the years we have received recognition from you, our partners, for our quality, reliability and transparency. For us, these are all natural core values of our operations, present from the very beginning. These values create customer satisfaction – an essential ingredient in any partnership.

Occupational safety is of paramount importance. One accident is one too many. We are happy that our long-term commitment to safety at work has created a safer environment both for workers and customers.

Thanks to all the partners for their cooperation so far. You can be confident that every day we want to develop ourselves and the way we operate so that your satisfaction with our level of services will grow and grow in the future.

Janne Laakso,
Managing director

PEPT Oy Ab's most notable expertise lies in industrial insulation, scaffolding and maintenance work, and HVAC insulation. Our goal in all our operations is to create value for our customers so that the customer can fully focus on their core business.

The strength of our family business is founded on professional and efficient staff, supply security, occupational safety, monitoring systems and continuous development of operations.

We work extensively in Finland and Sweden. Our main business is in Kaustinen. We hold the following certificates: ISO 9001, ISO14001, OHSAS 18001.

Industrial maintenance

PEPT is a trusted builder in industrial new construction and maintenance since 1992. Customized maintenance contracts and proactive maintenance shorten shutdown so that the customer can focus on production rather than maintenance. Our goal is to be the most desirable partner in the Nordic countries for scaffolding and insulation.

Industrial insulation and cladding work

Our strength is in insulation and cladding work for standard solutions for piping, equipment, boilers and tanks, all from planning to finished product. Our own prefabricated production and comprehensive scaffolding material guarantee a fast and cost-effective solution for our customers.

Unique planning and tracking system

With our scaffolding management system, we are able to control the entire lifecycle of the scaffolding.

Through the customer portal, customers can plan and order suitable scaffolding for themselves. The customer receives reliable and transparent reporting via the customer portal.

We employ a tailored ERP to monitor project timetables, material consumption and billing. The result is real-time and cost-effective monitoring.

Occupational safety is our common goal

Occupational safety controls our daily work. Our responsibility is to ensure a safe working environment for our customers, our employees and our contractors. We carry out 15-minute, weekly safety meetings at workplaces to familiarize our employees with new issues highlighted by the customer during the week, as well as topical comments. The weekly safety rounds of our workloads are documented accurately in the tracking system and the information is shared among the entire staff.

Case study: Alholmen Industrial Park, Pietarsaari

PEPT has strong professional maintenance and shut-down services. We have over 20 years of experience in the business. Excellent scaffolding solutions and expertise with the same insulation supplier are passed on to the customer as cost-effectiveness and time-savings. PEPT carefully plans the various work stages in advance. Good work planning makes cooperation flexible and ensures high quality work and safety.

PEPT has been working on scaffolding and insulation with companies in the Alholmen Industrial Park area for more than a decade. In addition to continuous

maintenance, cooperation has also included customer shutdown and investment, including an extensive range of scaffolding and insulation. Over the years, insulation work has included both thermal and cooling solutions. Thanks to our continuous presence, we have been able to flexibly meet the customers' needs for scaffolding solutions. Our local proximity has also made it possible quickly respond to emergencies. Our service has been available to customers 24 hours a day, every weekday.

Mission & values

Mission

To work in close cooperation with the customer to provide the best possible results in industrial maintenance, insulation and scaffolding work.

Our purpose is to help customers focus on their core business and create added value for the customer.
